

## AviAllamygly (Allyl Amyl Glycolate)

AviAllamygly emerges as a trailblazing solution, marking a transformative shift in perfumery, cosmetics, and flavor enhancement. Crafted through meticulous refinement, AviAllamygly harnesses the exceptional Properties of AviAllamygly Glycolate to elevate sensory experiences and enhance products across diverse industries.

AviAllamygly is a fusion of science and ingenuity, encapsulating innovation at its core. Developed through a sequence of precise steps, including reflux dehydration of isoamyl alcohol and strategic esterification reactions, AviAllamygly embodies advancement, setting the bar for quality and performance.

### General Info :

CAS Number	Molecular Formula	Molecular Weight
67634-00-8	$C_{10}H_{18}O_3$	186.251 gm/mol

### Sales Specification :

#### AviAllamygly

Parameter	AviAllamygly Specification
Appearance	Clear colorless liquid
Solubility	Soluble in alcohol
Assay	97.00 % min.
Specific Gravity@250C	0.935 – 0.943

### Market Applications :

- Add a modern sparkle to any fragrance
- Use in personal care, fabric care, home care etc.
- Use in Anti-perspirants / Deo , Creams and Lotions, Talcum Powder, Liquid Soap
